Great game, but the mappack DLC are no longer available from Games for Windows - Live. Do NOT purchase this product, as it is money wasted. I only put this here because Steam does not warn consumers about this.. if you cant activate the dlc thru live follow these steps, dont listen to the negative reviews about it not working just follow these steps

1 Find the folder "C:\Program Files (x86)\Steam\steamapps\common\Section 8 Prejudice\9game\CookedPCFinal\DLC\DLC2" on your computer.

2 Search for the "DLC2__S9Game.ini" file.

3 Open the ini file in wordpad or notepad or what ever text editor you have.

4 Find every instance of the line "RequiredDLCId=3" and delete that line of code.

5 Save the file and launch the game.

6 The maps should now be usable in games, enjoy your new maps.. Cannot get from windows live. Windows Market is no longer allowing download of dlc.. The two multiplayer maps that this gives are huge and full of details. This is for online play but can be played in Offiline mode. Its a great addition to the game and if you plan to play multiplayer then don't miss out on this extra content.
